

③ *to protect lives. With these products in existence, the harm they've already shown known to cause & the scope of their impact, I implore you to PLEASE act responsibly & remove these foods from public consumption until they are proven safe. (that could even happen). in the world but these GE crops make us feel like we have no choice.*

Dear Dr. Henney, I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1.

☒ All GE foods should be labeled so I am informed and have a choice.

☒ GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing to determine the long-term impacts to human health and the environment.

(Additional Personal Comments:)

① *The fact that the effects of GE foods cannot be contained in a small area or group of people, but that the seeds & pollen from such crops can & most likely will spread.*

② will (if allowed to be grown) affect the food supplies around the globe & thus the future of all people - as well as all life on earth - should be recognized by the FDA - & everyone else - as ~~is~~ an indication beyond any shadow of a doubt

Consumer Response to FDA Docket #00P-1211/CP1

that these things must be fully, irrefut-
ably tested & proven to cause absolutely no harm
to any living thing. They have already been
proven to cause harm. How can any conscious
being allow such things to exist? Life of
all beings on earth is at stake, literally. The FDA
overlooked
